

**A**  
**Project Report On**  
**"Lazy Beast"**  
(Java Mini Project)

**Prepared by**  
Jeet Undaviya (19DCE142)

**Under the Supervision of**  
Prof. Aishwariya Budhrani

**Submitted to**  
Charotar University of Science & Technology (CHARUSAT) for the Partial  
Fulfillment of the Requirements for the Degree of Bachelor of Technology  
(B.Tech.)  
in Computer Engineering (CE)  
for 3<sup>rd</sup> semester B.Tech

**Submitted at**

**Accredited with Grade A**  
**by NAAC Accredited**  
**with Grade A by KCG**

**Devang Patel Institute of Advance Technology and Research (DEPSTAR)**  
**DEPARTMENT OF COMPUTER ENGINEERING,**  
**,CHARUSAT At: Changa, Dist: Anand, Pin: 388421.**  
**October,2020**

## DECLARATION BY THE CANDIDATE

I hereby declare that the project report entitled “**Sysmate**” submitted by me to **Devang Patel Institute of Advance Technology and Research (DEPSTAR),Changa** in partial fulfilment of the requirement for the award of the degree of **B.Tech** in Computer Engineering, from **Devang Patel Institute of Advance Technology and Research (DEPSTAR)**, is a record of bonafide CE244 - Software Group Project - I 464-465 (project work) carried out by me under the guidance of **Prof. Aishwariya Budhrani**. I further declare that the work carried out and documented in this project report has not been submitted anywhere else either in part or in full and it is the original work, for the award of any other degree or diploma in this institute or any other institute or university.

Jeet Undaviya (19DCE142)

Prof. Aishwariya Budhrani Assistant Professor cum  
Research FellowEngineering, DEPSTAR,  
CHARUSAT-Changa.

## **ABSTRACT**

In today's world everyone is moving towards the digital machine leaving behind traditional paper-pen. So computer knowledge is the basic necessity for today. And hence there have been Operating System is gradually improving there GUI (Graphical User Interface) and is make more and more user friendly. But there is really very less evolution in CLI (Command Line Interface) and it have been pretty much the same over the years. Hence it has not been that user friendly and users always find it very difficult when their OS is facing some issue and they have to use CLI. Hence looking over to this issue I was motivated enough to solve this issue for Windows OS [ As many of the users are using it ].

## ACKNOWLEDGEMENT

I would like to express my special thanks of gratitude to my guide **Prof. Aishwariya Budhrani** who gave me the golden opportunity to do this wonderful project on the topic 'Lazy Beast', and was made herself available for all the query, questions and suggestions from her busy schedule I am really thankful to her for the same.

Secondly the project would not have been possible without the proper guidance of my friend **Dhaiwat Metha** who is a Cyber security analyst and have suggested me some of the best outcomes of the project which I could get.

A special thanks to **Prof. Shivam Ribadiya** and **Prof. Khushi Patel** who examined the projects and helped me a lot in exploring insights about the project and suggesting different ideas for features in projects.

# **CHAPTER 1: INTRODUCTION**

## **1.1 Introduction**

The project of the name is 'Lazy Beast' which explains pretty much everything from its name that it is the software which is designed for lazy users who don't want to remember the commands of the CMD (Command Prompt) and can still do pretty much fire up the commands just by passing few shortcuts for the commands.

## **1.2 Origin of the idea**

There exist such script for the Linux environment called 'Lazy Script' which is developed for performing penetration testing and hacking in an easier way.

**But it is strictly platform dependent [Linux]**

The GitHub link for this project is as below :-

<https://github.com/arismelachroinos/lscript>

**Hence if you want to try something like it for Windows then you can try my project.**

GitHub link for my project [Lazy Beast] is as below :-

<https://github.com/jeetundaviya/Lazy-Beast>

### **1.3 Why should anyone care about it ?**

This is totally modifiable terminal which can pretty much perform any of the system operation you want hence we can make use it for some of specific purpose when we have restrict want some of the restriction on some of the commands and hence we can do the same and use it for the specific purpose only.

Secondly as there are many of the shortcuts hence any of the normal user can just fire up the command like a piece of a cake without remembering any of it.

## **CHAPTER 2: FEATURES**

### **2.1 Features**

- Easy to remember shortcuts
- Help and Usage for every shortcuts
- Open and Close any programs from the same terminal.
- Modify the console [Color ,Prompt ,Title] as per your requirement.
- Run all the networking commands just by few shortcuts.
- Get all the Logs for each commands.
- Can directly generate archive in any format for any files or folder.
- It can perform any of the System CMD operation right from the same terminal and can even open new system terminal window.
- It can directly open Python console.
- It can clear the console any time by typing its shortcut.

## **CHAPTER 3: SOFTWARE REQUIREMENTS**

### **3.1 Software Requirements**

Operating System :- Windows

Software :- 1. CMD(Command Prompt)  
2. JRE (Java Runtime -  
-Environment)

## **CHAPTER 4: COMMANDS AND ITS USAGE**

## 4.1 Commands and its usage

- **'0' OR 'back'**

This command is used to come back to main Console.

Eg. back OR "0"

- **'1' OR 'clear' OR 'c'**

This command is used to clear to any Console.

Eg. clear OR "1" OR "c"

- **'2' OR 'open'**

This command is used to open program.

NOTE :- Program will open in new window. And "open -m" will display menu for opening programs with shortcuts.

Eg. open notepad xyz.txt OR o 1 OR "2 notepad.exe"

- **'3' OR 'close'**

This command is used to exit from any Console or to close any on-going console or program.

NOTE:- Typing 'close -all' will open all programs running similar process.

Eg. close PyCmd OR close OR "3" OR "3 SysCmd"

- **'4' OR 'help'**

This command is used to have excess to Help Console.

Eg. help OR "4" OR "h"

- **'5' OR 'modify'**

This command is used to modify the colour, title and prompt Console.

NOTE:- Typing 'modify off' all modification will be disabled and it will do the the default colour, title and prompt.

Eg.modify colour OR "5 title"

- **'6' OR 'syscmd'**

This command is used to have excess to System Console or to run any sys commands.

NOTE:- Typing 'SysCmd -n' will open SysCmd program in a new window.

Eg. syscmd OR  
syscmd ping www.google.com OR "6"

- **'7' OR 'pycmd'**

This command is used to have excess to Python Console.

NOTE:- Program will open in new window.

Eg. pycmd OR "7"

- **'8' OR 'archive' OR 'arc'**

This command is used to make archive of files and folders in different format like 7z,zip,rar,etc.

NOTE:- Only typing 'archive' will open 7z File-Manager program in a new window.

Eg. arc <extension> <output loc> <input loc> OR "8"

- **'9' OR 'sysnet' OR 'net'**

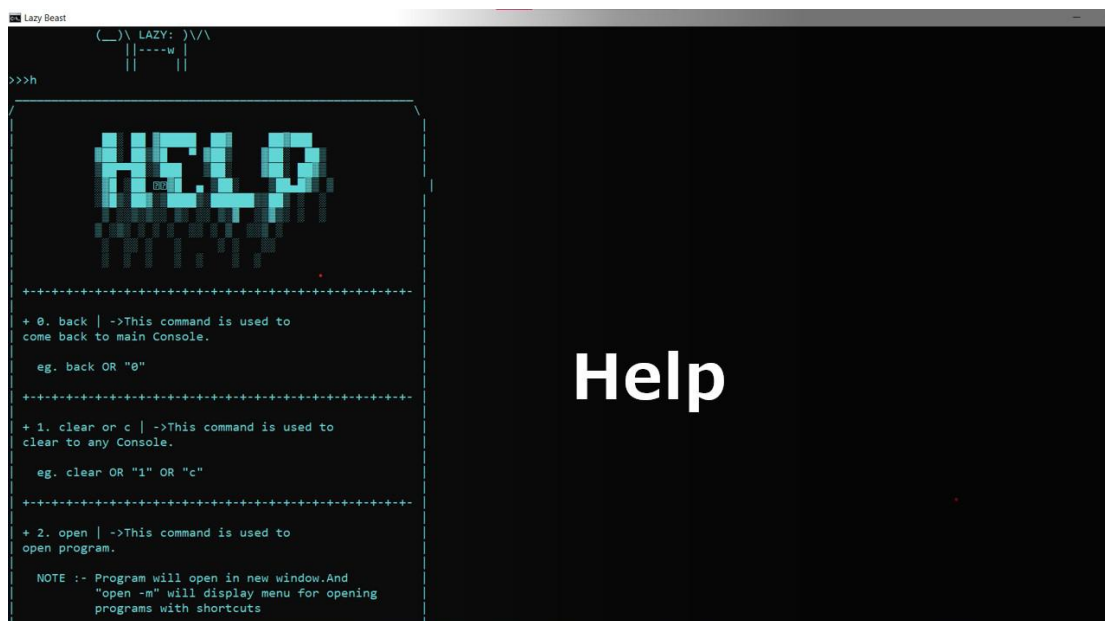

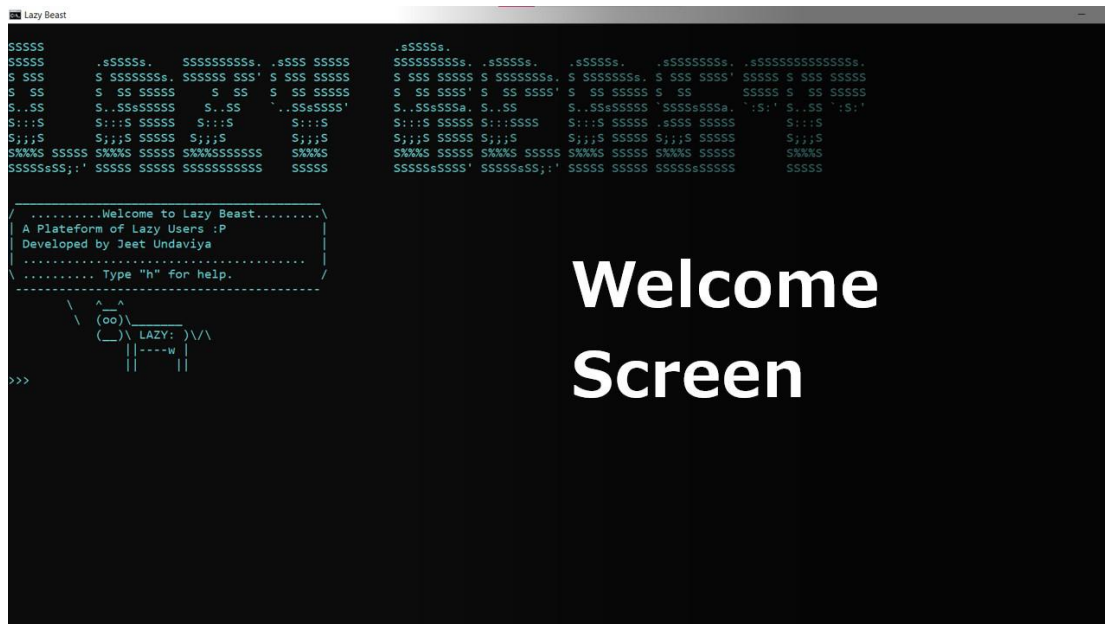

This command is used to execute networking commands and display in console.

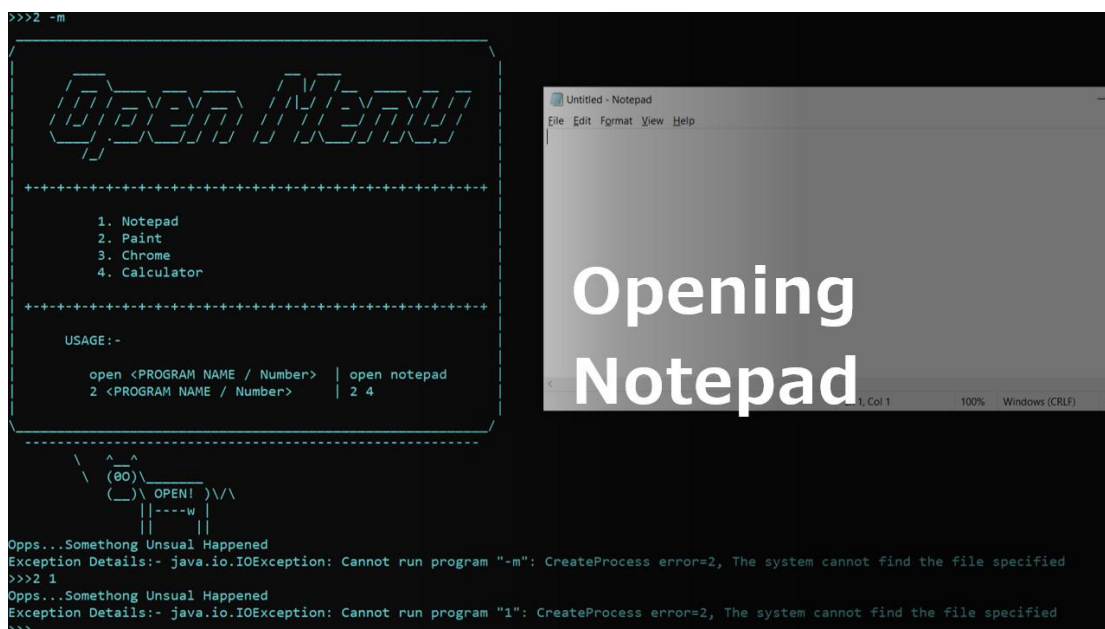

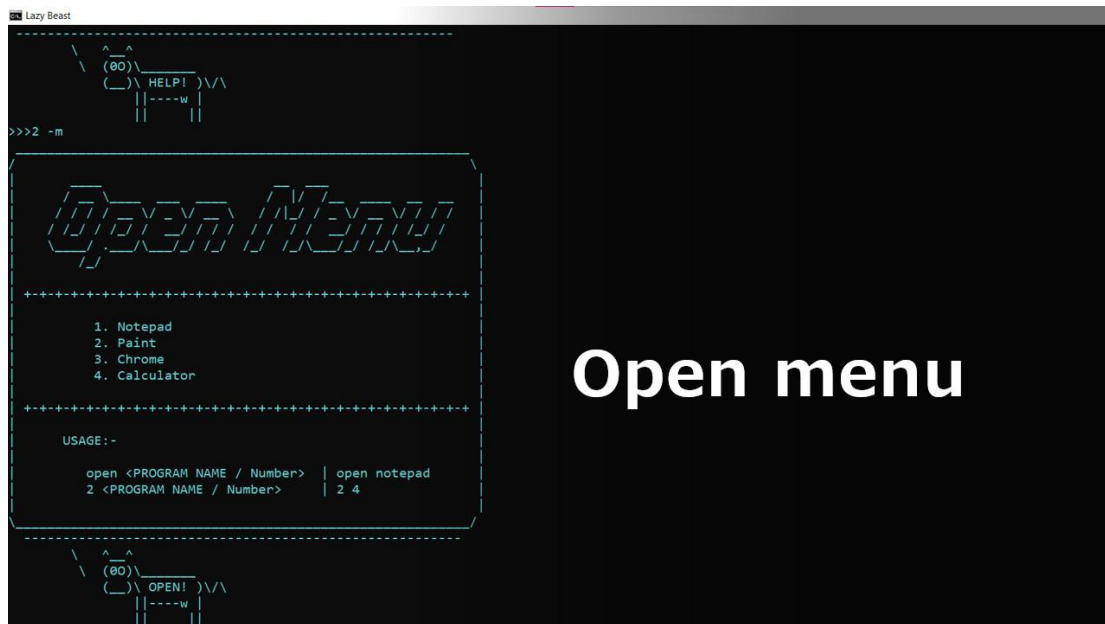

NOTE:- Program will open in new window. And "sysnet -m" will display menu for opening program with shortcuts.

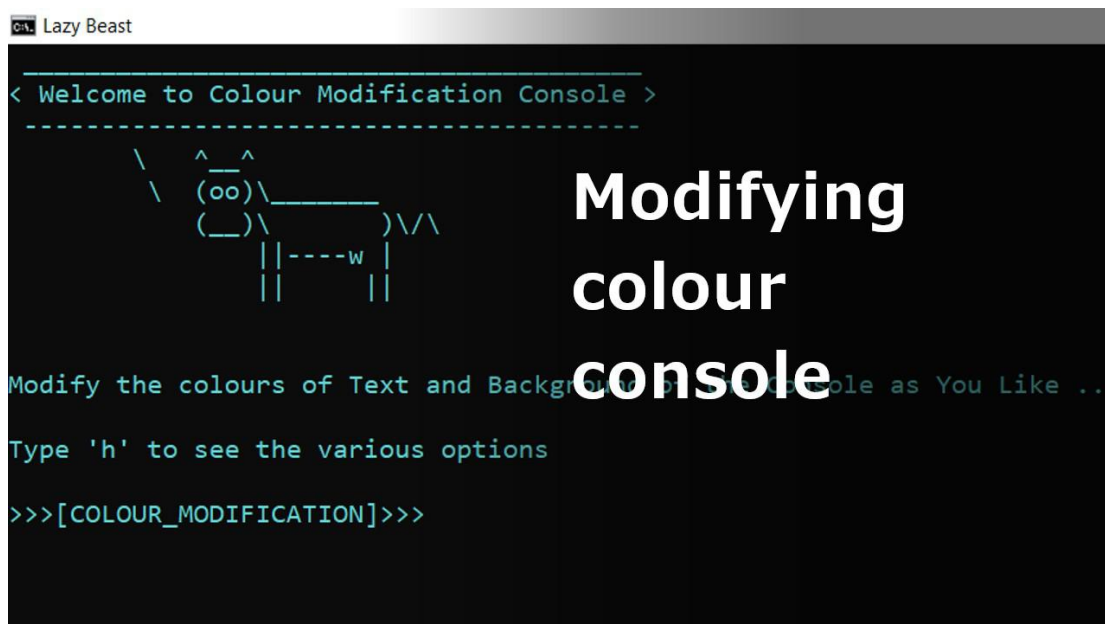

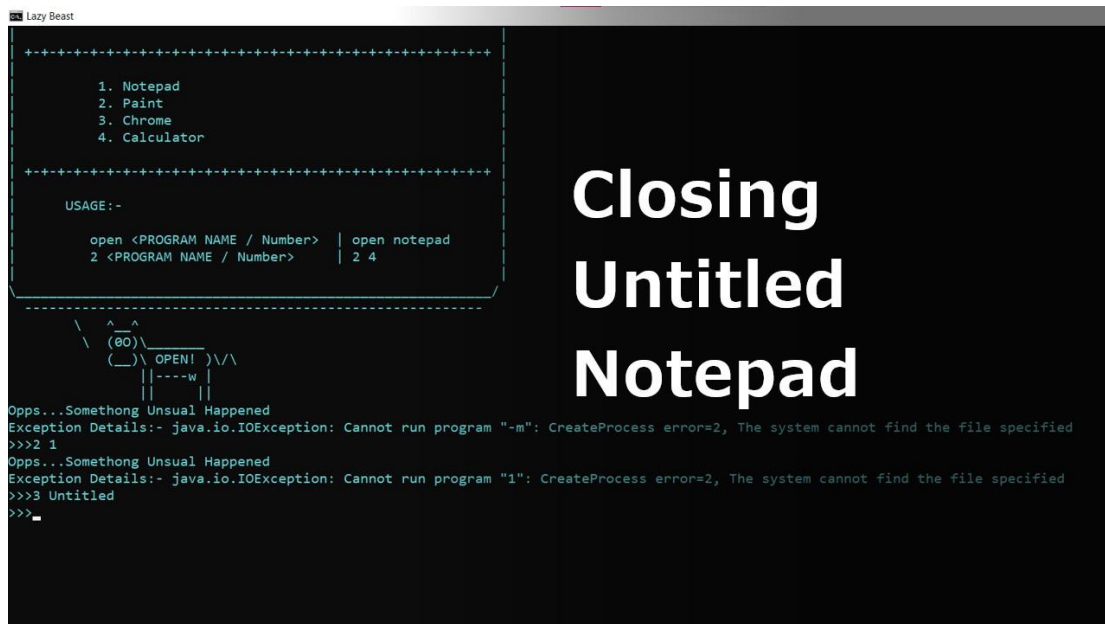

Eg. sysnet -m OR "9 <Sub command>"

## **CHAPTER 5: SCREENSHOTS**

# Back to main

## Back to main console

```
Lazy Beast
+
+ 0 = Black      8 = Gray
+ 1 = Blue       9 = Light Blue
+ 2 = Green      A = Light Green
+ 3 = Aqua       B = Light Aqua
+ 4 = Red        C = Light Red
+ 5 = Purple     D = Light Purple
+ 6 = Yellow     E = Light Yellow
+ 7 = White      F = Bright White
+
+ SPECIAL COMMANDS :-
+
+ 1. 'DEFAULT'          | -> It will set colors to default background black and foreground white.
+ 2. 'SWAP'             | -> It will interchange background and foreground colors and vice-versa.
+ 3. 'RANDOM_FOREGROUND' | -> It will set random color for foreground colour.
+ 4. 'RANDOM_FOREGROUND_WITH_BLACK_BACKGROUND' | -> It will set random color foreground colour with black background.
+ 5. 'RANDOM_BACKGROUND' | -> It will set random color for background colour.
+ 6. 'RANDOM'            | -> It will set random color for foreground and background color in a random manner.
+ 7. 'COOL_FOREGROUND_MODE' | -> It will continuously change foreground color in a random manner.
+ 8. 'COOL_BACKGROUND_MODE' | -> It will continuously change background color in a random manner.
+ 9. 'PRO_COOL_MODE'    | -> It will continuously change foreground and background color in a random manner.
+
+ USAGE :-
+
+ eg. use <SPECIAL COMMANDS>          | -> use DEFAULT OR use default
+ eg. use <SPECIAL COMMANDS INDEX>     | -> use 1
+ eg. color <HEXA DECIMAL CODE>       | -> color FC //It will make bright black background and white foreground
+

>>>[COLOUR_MODIFICATION]>>>use 6
>>>[COLOUR_MODIFICATION]>>>use 6
>>>[COLOUR_MODIFICATION]>>>use 6
>>>[COLOUR_MODIFICATION]>>>use 6
>>>[COLOUR_MODIFICATION]>>>0
>>>
```

## Modifying title console

```
Lazy Beast
< Welcome to Title Modification Console >
-----
      ^ ^
      (oo)\_____
      (--)\/       )\/\
      ||-----w |
      ||           ||

Modify the title of the Console as You Like .....

Type 'h' to see the usage.

>>>[TITLE_MODIFICATION]>>>
```

```

Lazy Beast
java@mini~project# modify off
>>>

```

## Disabling modification and switching back to defaults

```

Lazy Beast
make archive of files and folders in
different fromat like 7z,zip,rar,etc.

NOTE:- Only typing 'archive' will open
7z File-Manager program in a new window.

eg. arc <extension> <output loc> <input loc> OR "8"
+++++-----

+ 9. sysnet or net | ->This command is used to
execute networking commands and display in console.

NOTE :- Program will open in new window.And
"sysnet -m" will display menu for opening
programs with shortcuts

eg. sysnet -m OR "9 <Sub command>"

command created**

## **CHAPTER 6: FUTURE ENHANCEMENT**

## **6.1 Future enhancements**

I made this project just for the CMD (Command Prompt). But it could be also developed for the Powershell , Linux terminal or for Termux (android mobile Linux terminal).

And also the addition of the features in it is always limitless. Hence there can always be scope of improvement in it.
